SauceDemo Automation – Python Automation Testing

Tutorial 11: Python Automation Testing Test Execution Report

Module Name:	Python Automation Testing	**Test Case ID:**	TC_AUTO_011
Tester Name:	Rathod Deepak	**Web URL:**	https://www.saucedemo.com/
Prerequisites:	- Google Chrome browser installed. - Python 3.x and PyCharm IDE configured. - Selenium package installed via pip. - Target website accessible (https://www.saucedemo.com/).	**Environment:**	OS: Windows 11 Browser: Google Chrome IDE: PyCharm Python: Python 3.x + Selenium

Test Scenarios

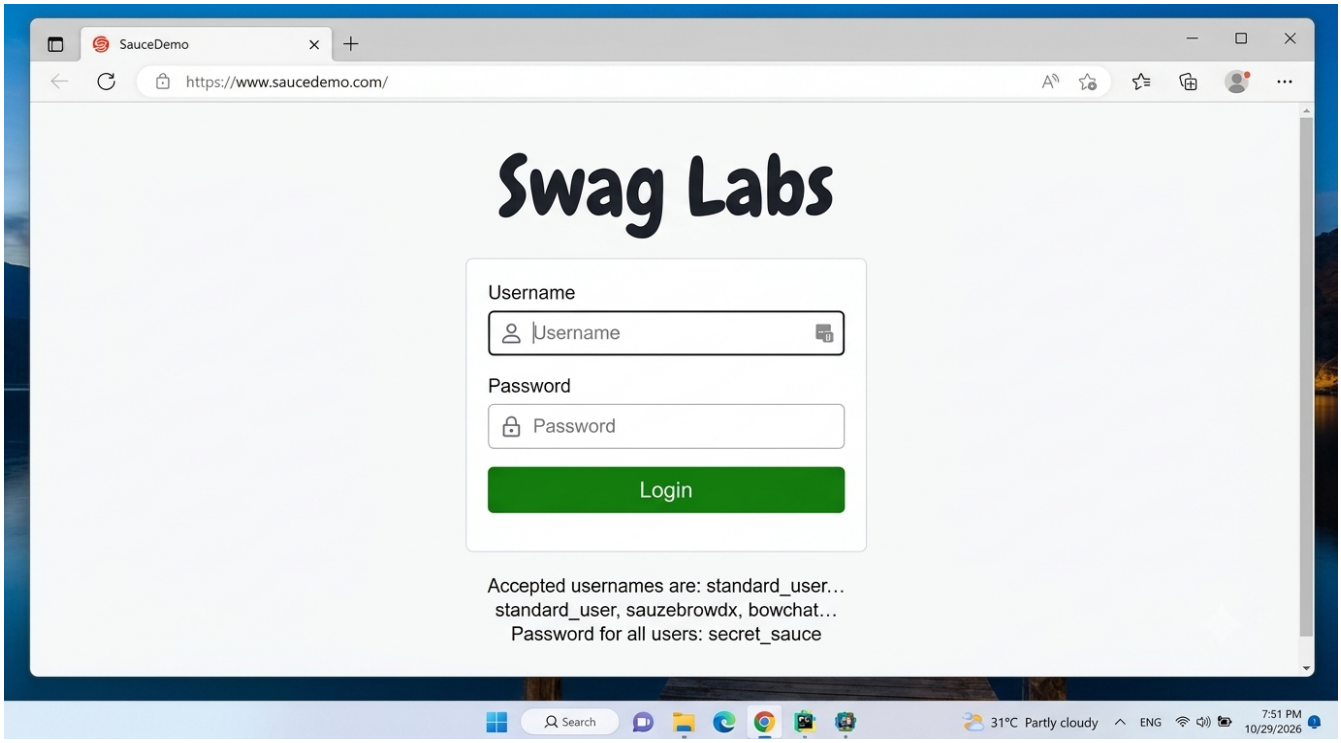

SCN-11-01 — Verify Login Page Navigation

Test Steps:

• Open Google Chrome browser.
• Navigate to https://www.saucedemo.com/.
• Verify that the SauceDemo Login page is displayed successfully.

Status: **Pass**

Screenshot — Desktop Size

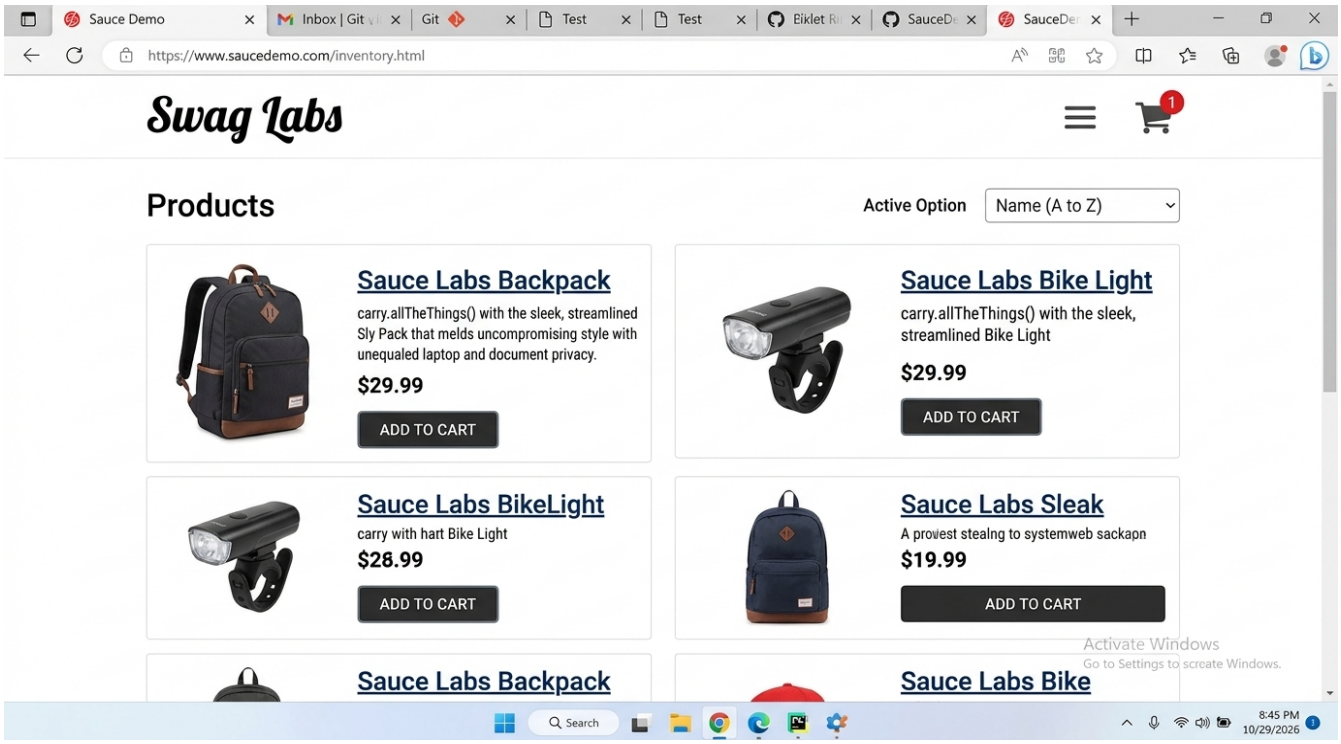

Evidence 1: Verify Login Page Navigation

SCN-11-02 — Verify Valid Login Authentication

Test Steps:
• Open the SauceDemo login page.
• Enter standard_user into the Username field.
• Enter secret_sauce into the Password field.
• Click the Login button.
• Verify that the Products inventory page is displayed.

Test Input: Username: standard_user, Password: secret_sauce
Expected Result: The user should be authenticated and redirected to the inventory catalog.
Actual Result: User authenticated successfully and inventory page was displayed.
Status: **Pass**

Evidence 2: Verify Valid Login Authentication

SCN-11-03 — Verify Product Selection & Add to Cart

Test Steps:
• Navigate to the products inventory page.
• Locate 'Sauce Labs Backpack'.
• Click the 'Add to cart' button.
• Verify the cart badge displays '1'.

Test Input: Element ID: add-to-cart-sauce-labs-backpack
Expected Result: Product should be added to cart and button text changes to 'Remove'.
Actual Result: Product was added to cart and cart counter updated to 1.
Status: **Pass**

Screenshot — Desktop Size

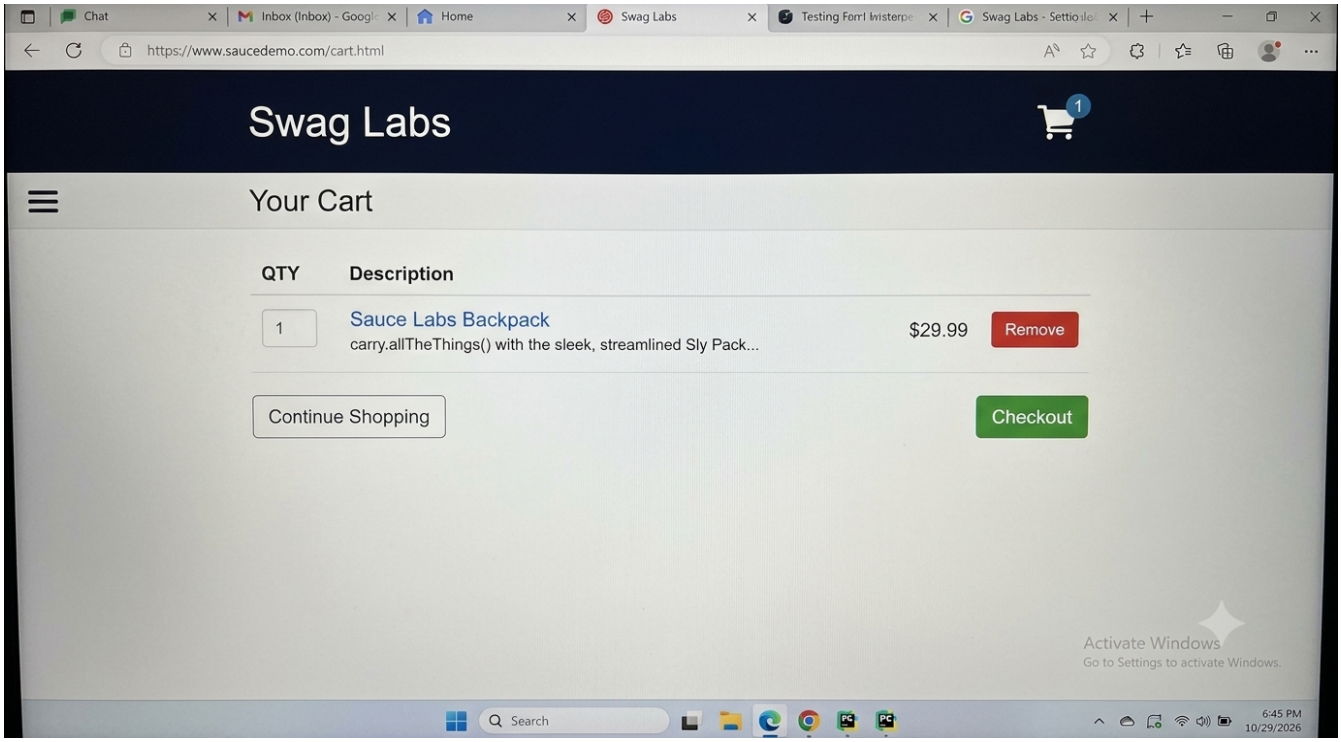

Evidence 3: Verify Product Selection & Add to Cart

SCN-11-04 — Verify Shopping Cart Page

Test Steps:
• Click the shopping cart icon link in the header.
• Verify the cart page opens.
• Verify that 'Sauce Labs Backpack' is listed with quantity and price.

Test Input: Class Name: shopping_cart_link
Expected Result: The cart page should display the selected item with accurate price and Remove option.
Actual Result: The cart page opened and verified selected item successfully.
Status: **Pass**

Screenshot — Desktop Size

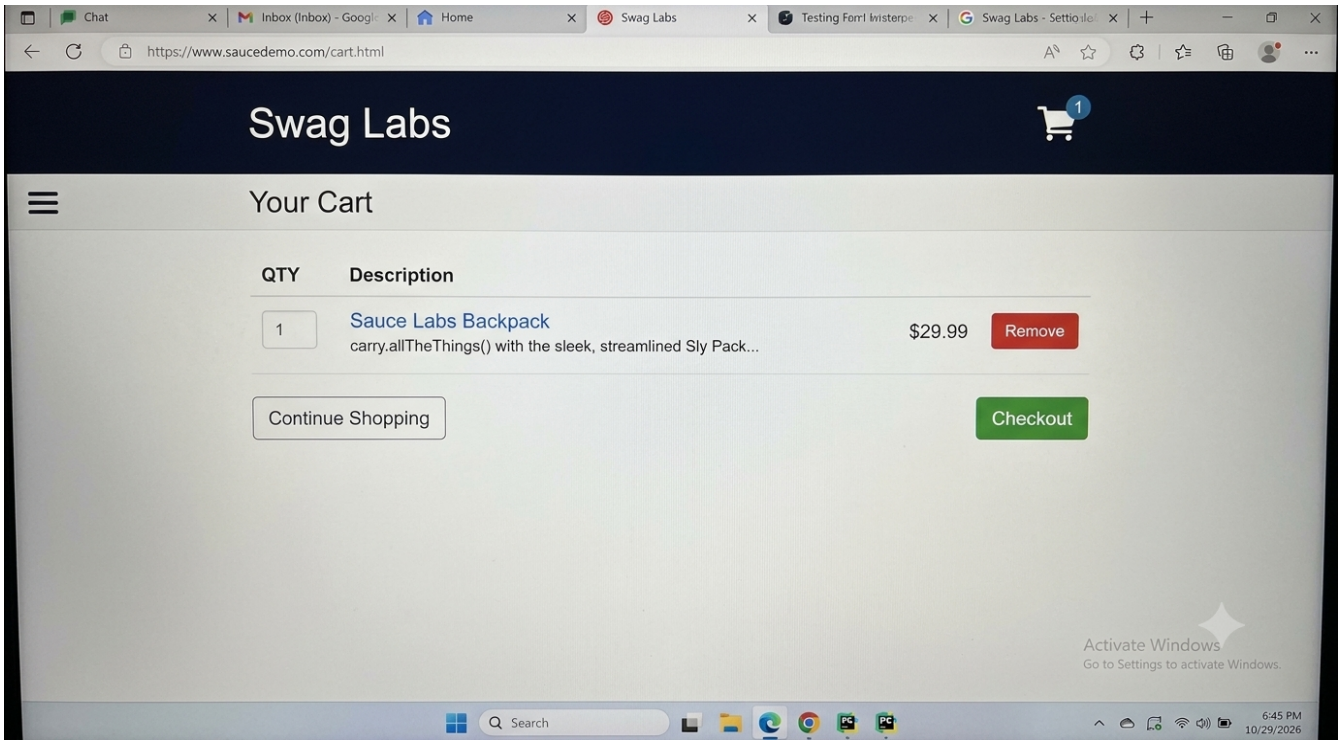

Evidence 4: Verify Shopping Cart Page

SCN-11-05 — Verify Multi-Page Workflow & Checkout

Test Steps:
• From Cart page, click 'Checkout' button.
• Enter First Name, Last Name, and Postal Code.
• Click 'Continue' button.
• Verify navigation to 'checkout-step-two'.

Test Input: First: Student, Last: Testing, Zip: 380001
Expected Result: User should navigate to Checkout Step Two overview page.
Actual Result: Checkout information accepted and overview page displayed.
Status: **Pass**

Screenshot — Desktop Size

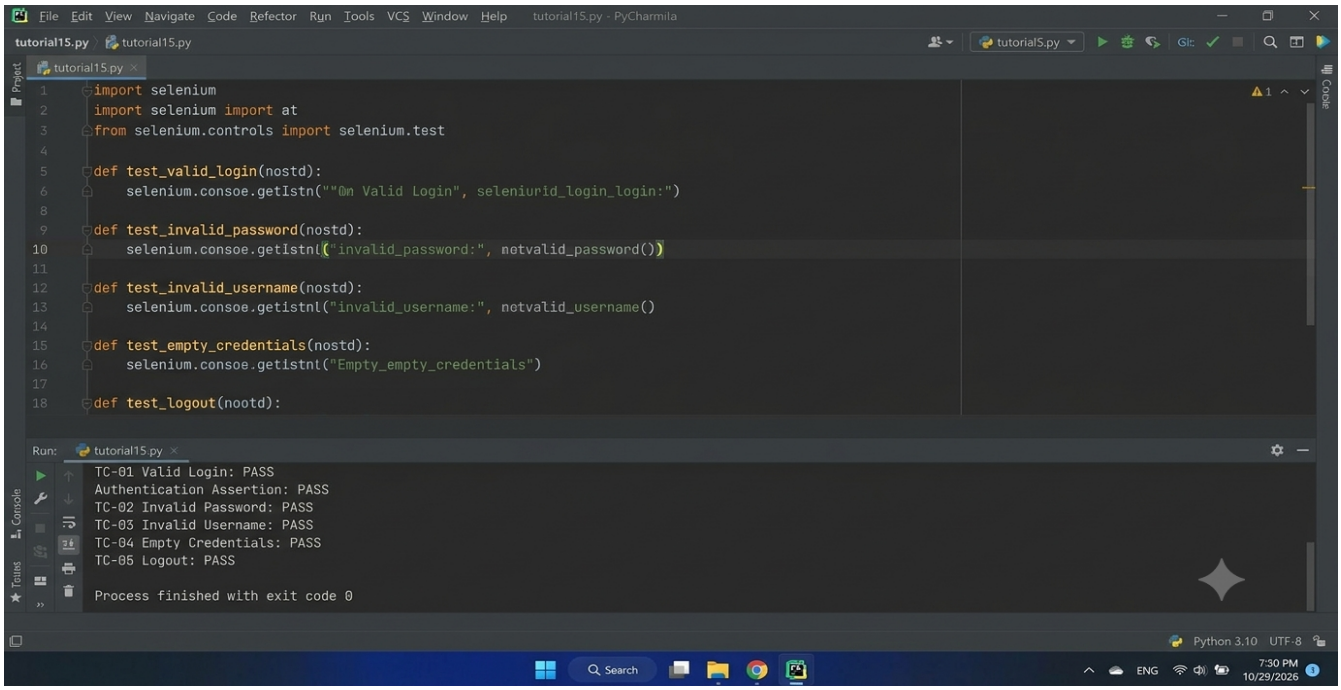

Evidence 5: Verify Multi-Page Workflow & Checkout

SCN-11-06 — Verify Automated Regression Execution

Test Steps:
• Execute tutorial11.py automation script in PyCharm.
• Verify complete navigation flow from login to checkout.
• Check console log for validation assertions.

Test Input: Script: tutorial11.py
Expected Result: All Selenium test cases and assertions should pass with exit code 0.
Actual Result: All automated assertions passed and console output logged PASS.
Status: **Pass**
