SauceDemo Automation – Selenium Web Automation

Tutorial 14: Selenium Web Automation Test Execution Report

Module Name:	Selenium Web Automation	**Test Case ID:**	TC_WEB_014
Tester Name:	Rathod Deepak	**Web URL:**	https://www.saucedemo.com/
Prerequisites:	- PyCharm IDE and Python environment configured. - Selenium package installed. - Chrome browser installed. - Target website accessible (https://www.saucedemo.com/).	**Environment:**	OS: Windows 11 Browser: Google Chrome IDE: PyCharm Python: Python 3.x + Selenium

Test Scenarios

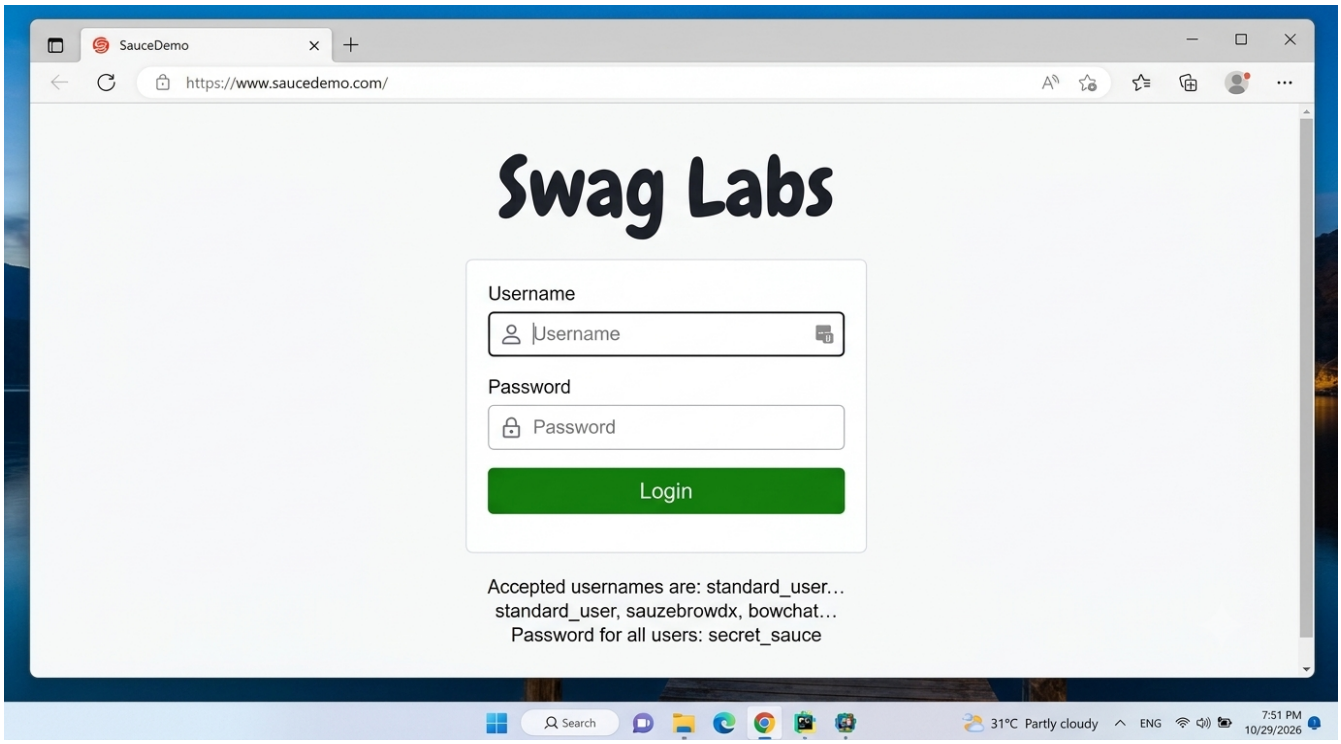

SCN-14-01 — Verify Browser Navigation & Window Sizing

Test Steps:

• Initialize Chrome WebDriver.
• Maximize browser window using driver.maximize_window().
• Navigate to https://www.saucedemo.com/.
• Verify page title.

Status: **Pass**

Screenshot — Desktop Size

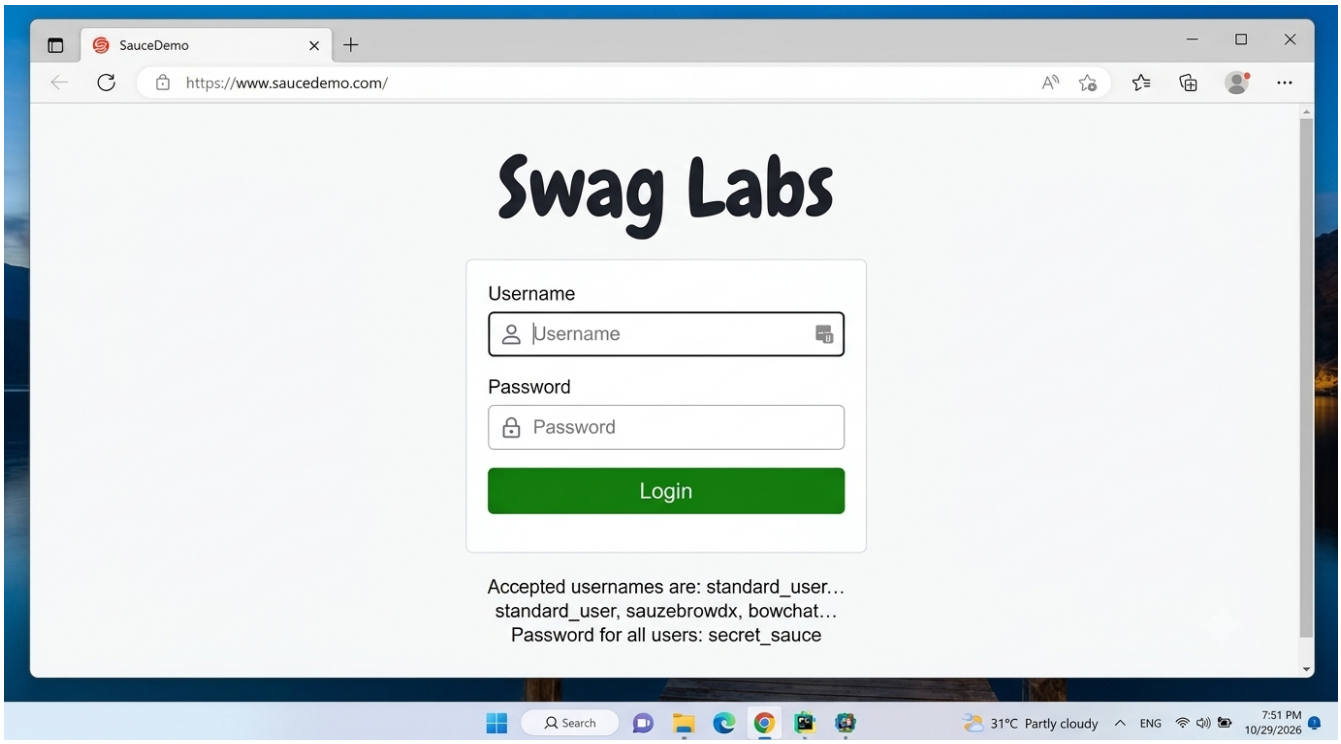

Evidence 1: Verify Browser Navigation & Window Sizing

SCN-14-02 — Verify Form Input Handling (send_keys)

Test Steps:
• Locate username input field by ID 'user-name'.
• Enter standard_user using send_keys().
• Locate password field by ID 'password'.
• Enter secret_sauce using send_keys().

Test Input: Username: standard_user, Password: secret_sauce
Expected Result: Both input fields populated with valid credential text.
Actual Result: Form inputs handled and text populated correctly.
Status: **Pass**

Screenshot — Desktop Size

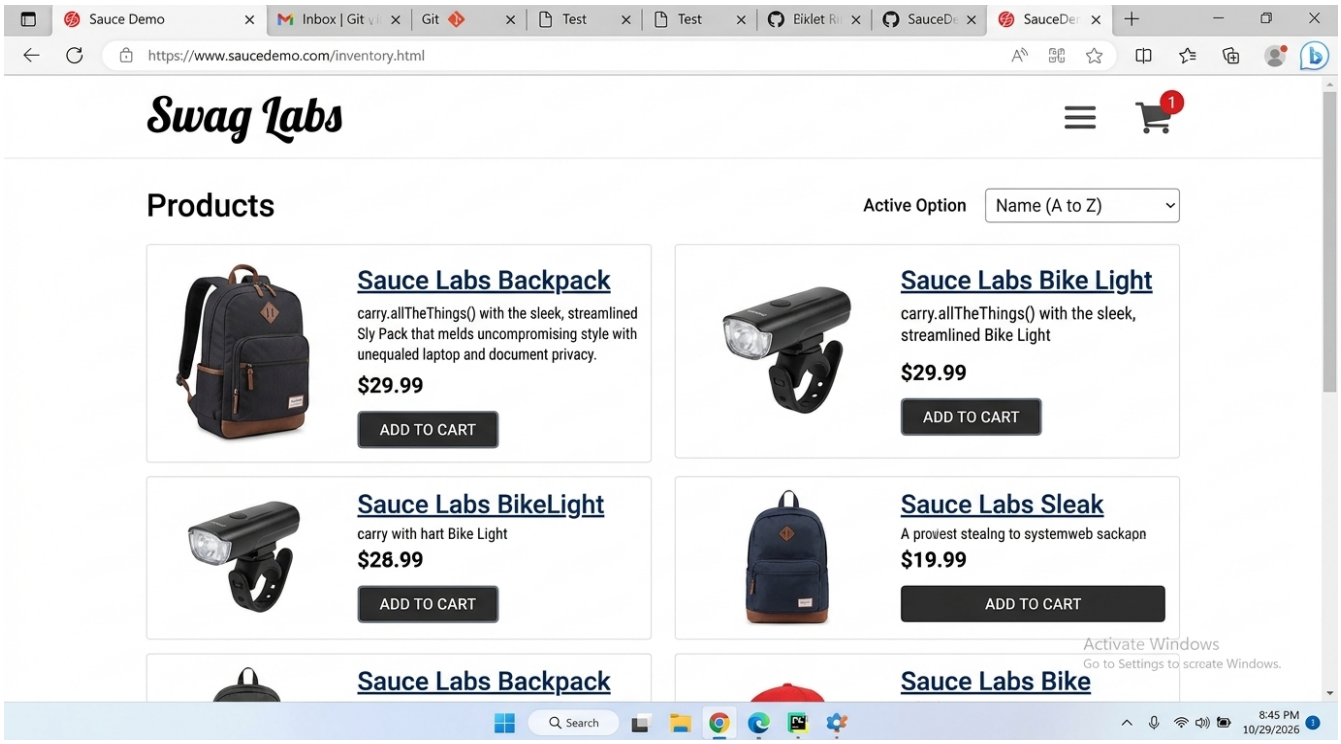

Evidence 2: Verify Form Input Handling (send_keys)

SCN-14-03 — Verify Button Click & Login Assertion

Test Steps:
• Locate login button by ID 'login-button'.
• Click button using .click().
• Wait for URL redirection.
• Assert 'inventory' in driver.current_url.

Test Input: Element ID: login-button
Expected Result: Login submitted successfully and user redirected to inventory.
Actual Result: Inventory page reached and assertion passed.
Status: **Pass**

Screenshot — Desktop Size

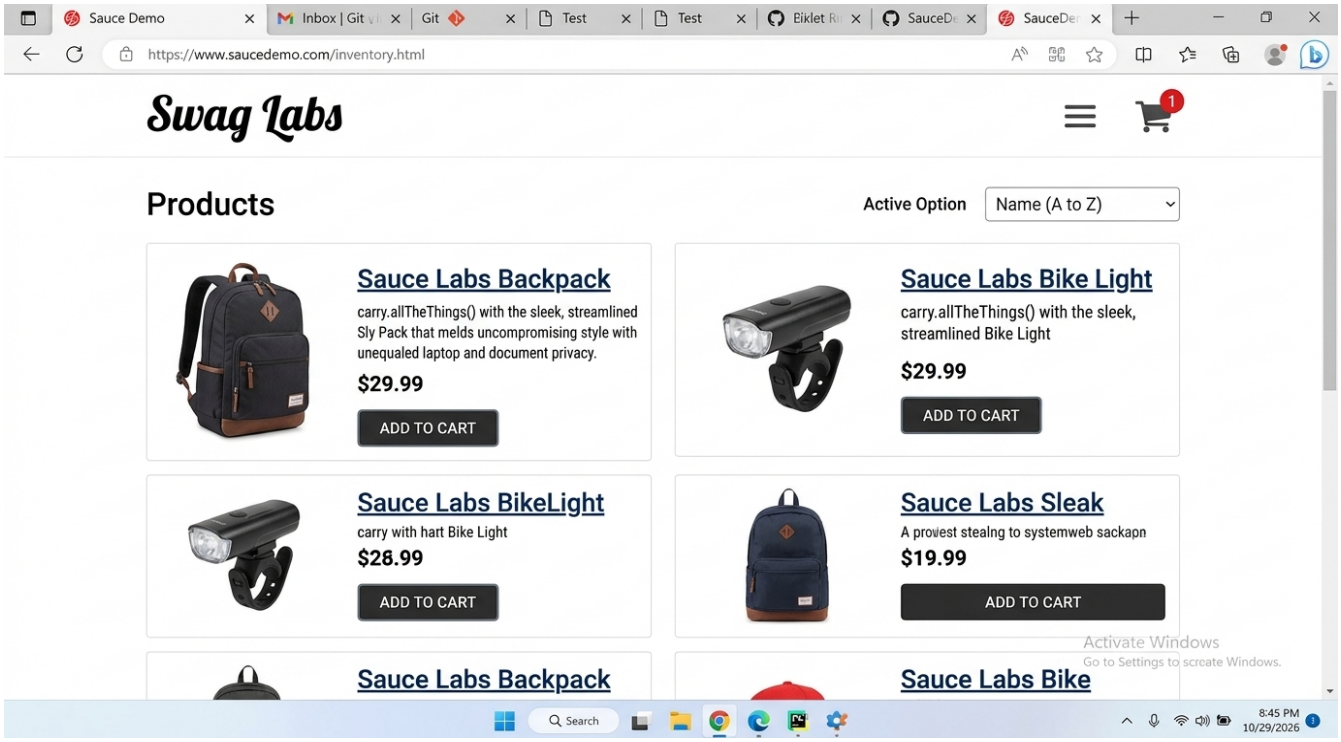

Evidence 3: Verify Button Click & Login Assertion

SCN-14-04 — Verify Web Element Interaction (Add to Cart)

Test Steps:
• Locate product button 'add-to-cart-sauce-labs-backpack'.
• Click button to add item.
• Verify button text updates to 'Remove'.

Test Input: Element ID: add-to-cart-sauce-labs-backpack
Expected Result: Product added to cart and button state toggled.
Actual Result: Product added to cart and state toggled successfully.
Status: **Pass**

Screenshot — Desktop Size

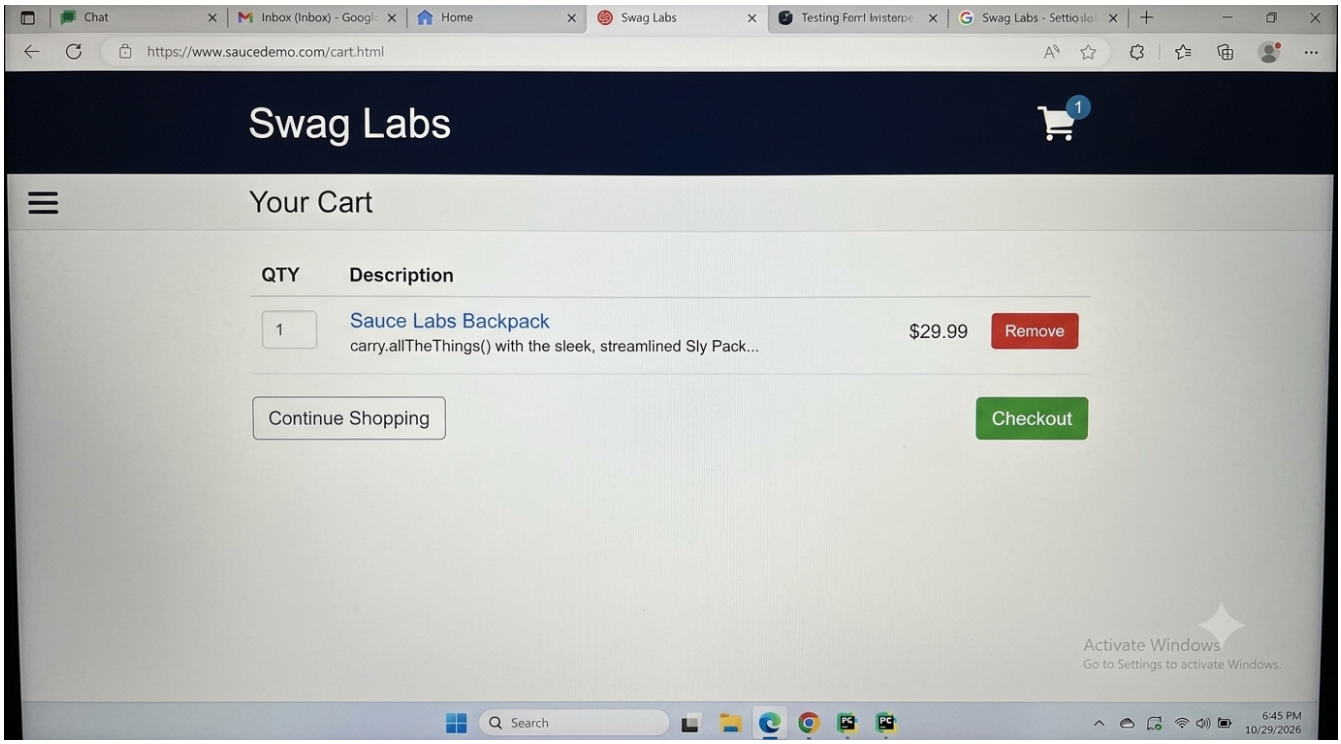

Evidence 4: Verify Web Element Interaction (Add to Cart)

SCN-14-05 — Verify Cart Navigation & URL Validation

Test Steps:
• Locate cart link by class 'shopping_cart_link'.
• Click cart link.
• Assert 'cart' in driver.current_url.
• Verify cart page items.

Test Input: Class Name: shopping_cart_link
Expected Result: Cart page displayed and cart URL verified.
Actual Result: Cart page displayed with selected item and verified.
Status: **Pass**

Screenshot — Desktop Size

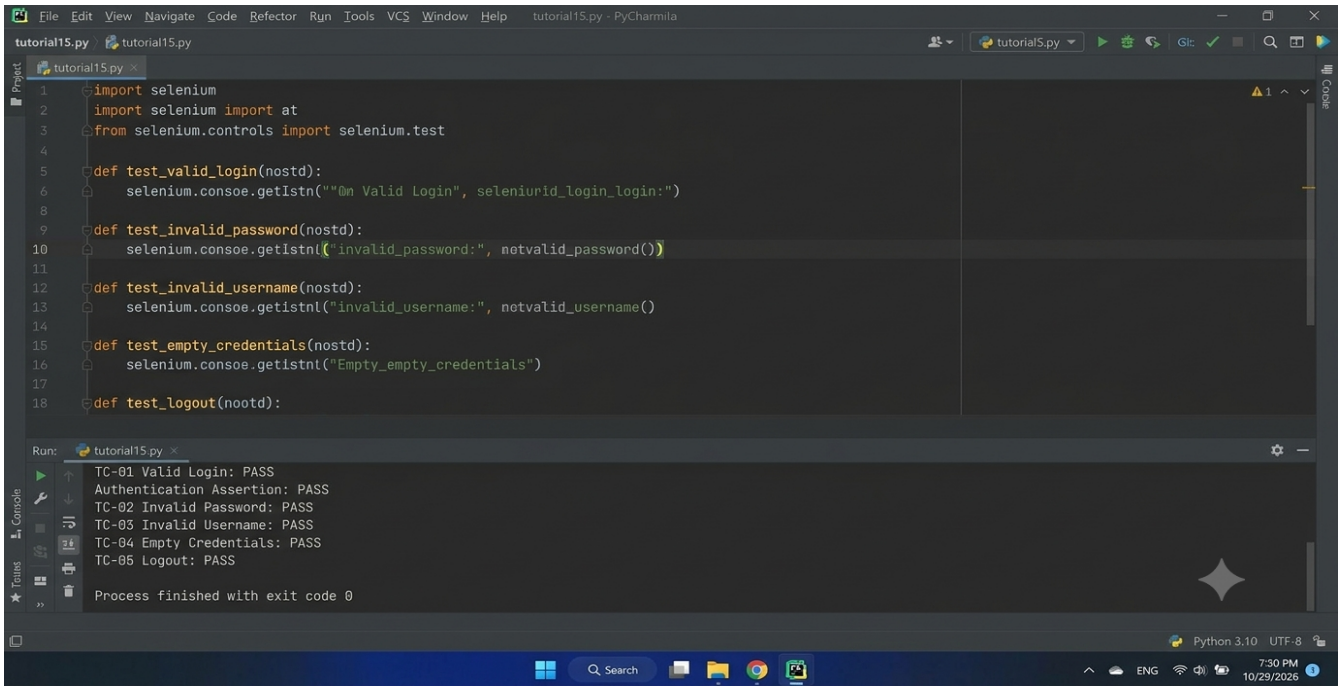

Evidence 5: Verify Cart Navigation & URL Validation

SCN-14-06 — Verify Complete Execution Console Log

Test Steps:
• Execute tutorial14.py script.
• Verify all intermediate console logs (Title, PASS validations).
• Verify script completes with exit code 0.

Test Input: Script: tutorial14.py
Expected Result: Console logs: 'All Selenium Web Automation Tests Passed'.
Actual Result: Console logged success message and exited cleanly.
Status: **Pass**

Screenshot — Desktop Size

Evidence 6: Verify Complete Execution Console Log

Summary of Test Results

Total Test Cases	Passed	Failed	Pass Percentage	Overall Verdict
6	**6**	0	**100%**	**PASSED**

All 6 planned test scenarios for Tutorial 14: Selenium Web Automation were executed successfully with a 100% pass rate, covering positive workflows, negative validation, assertions, and PyCharm execution logs.
